**Subject:** Fwd: Important message on Asian Carp

**URGENT!!! ,, , Everyone must respond to this crisis ... if we hope to save the Great Lakes from this terrible menace. We may already be too late, but we must try! Do it now .... Bill Sr.**

Follow the link above to Will Elliott's column in today's (Sunday) Buffalo News.... Glad I didn't have him put my phone number in the paper.

If you have time Wednesday watch the meeting in Ypsilanti Michigan on the internet even if it is just the first ten or fifteen minutes... and make a comment... you can tell them that "over the past ten years they have failed to prevent the Asian carp from reaching Lake Michigan... the Framework is nothing new. We are depending on the same agencies that failed for the past ten years to prevent asian carp from reaching Lake Michigan to execute this new plan. Why should we expect the results to be any different, they will not. The Army Corps of Engineers have a proven track record of failure to stop the goby, then the Asian carp, they have demonstrated they have no sense of urgency protecting the Great Lakes. Close the locks NOW on the canals to prevent more carp from reaching Lake Michigan. Take aggressive actions to kill those carp that have breached the barriers."

I need everyone to make a comment similar to this... it goes into the public record. The Barge operators were well organized at the meeting in Chicago it was overwhelming against closing the locks. If we lose this battle the Great Lakes will not be so great anymore. For my friends on Lake Ontario this is not so far from you that it is not important, there is the Welland Canal and fish do survive the plunge over the falls.

Please send this to your friends who are interested in the health of the Great Lakes ... send it right away, there is not much time. If anyone can go to the meeting in Ypsilanti (near Ann Arbor Mi.) Please go, we need to make a big showing. I am certain the barge operators in Chicago are bussing in supporters. See you in Ypsilanti.
