Art,

Missed you at the directors meeting Tuesday night. Please post this e-mail and answer on our website.

Don

Jim'

Please do not think this is a project initiated by the people of the East Shore. We have many residents here who are on **both** sides of this issue.

I do strongly object you saying **all** we do is pay taxes. (By the way the amount we pay is significant.)

Organizations around this lake pour tens of thousands of dollars into protecting this lake.

We spend hundreds of hours out on the lake performing various tasks to protect Schroon Lake for everyone.

We do biological testing of the waters at several locations.

We collect deep and shallow water samples eight times a year in both the north and south basin.

We have 65 volunteers who check our shoreline for invasives plants or other problems.

We participate in Adopt-A -Highway Programs so our area will look nice for everyone.

The three towns employ an individual to remove milfoil from our waters.

Do not think all we do is pay taxes.

I do respect your opinion and understand your concerns.

Sincerely

Bill McGhie

President ESSLA

I can not attend the meeting as you all know.

Joe Koch is an idiot and a liar. We have proved this at a meeting in Brant Lake a couple of years ago. He like some others on that east shore would have us paddling around in canoes. He has a grudge against boaters on this lake. I have had one of the fastest boats on this lake for some 35 years, yes it is load but when I go fast it is in the middle of the lake and in the later afternoon, and it is maybe for 1-2 minutes of the entire day. I have not hurt or harmed anyone, along with my other friends that have the same kind of fast boats. Why don't you look at the people that have gotten hurt and see why!!!! We are some of the most responsible boaters on this lake, we put alot of money into this town, in the name of food sales, and fuel sales. Why do we have fast boats, it is our hobby and our passion. These people around the shore lines, all they do is pay taxes, they don't support or even care about the town. You know they talk about noise from these boats, well what about the trucks or lawn mowers going at 7:00am in the morning. That is more invasive than my boat. You want people to come out in force they will. Mr. Koch will see the same ones he lied to in Brandt Lake. If he is heading this up why not ask him about the dead people that signed his petition? Also bass boats would have to go. We are friends of this town. We have supported it for 40 some odd years, don't take away our passion. JIM ROBBINS
